

Mean Absolute Error for 15 Worst Pre  
Samples ordered by actual CP concentration

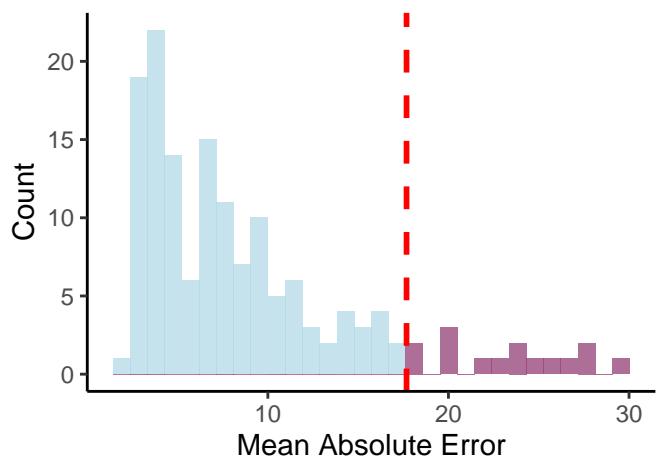

Location Distribution: Worst 15 Sample  
Dark bars = % of worst samples, Light bars =

Actual vs Predicted CP for 15 Worst S  
Dashed line represents perfect prediction

Distribution of Mean Absolute Errors  
Red line shows threshold for worst 15 sample

Model Type: ● Unweighted, ▲ Weighted Location: ● Geneva, ● Ithaca

Sample Type: All Samples (light blue), Worst Samples (maroon)
